1 Setting up Calendar/Contacts on iOS with CalDAV/CardDAV

1

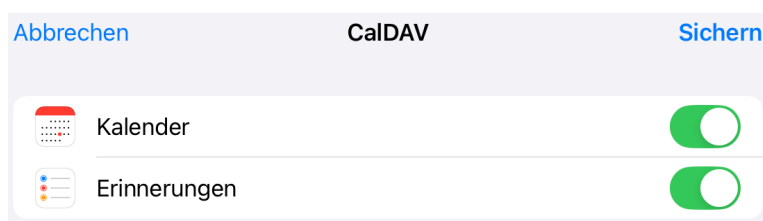

1 SETTING UP THE CALENDAR AND CONTACTS ON IOS WITH CALDAV/CARDDAV

First, open the "Settings" app. Go to "Apps," search for "Mail," and tap "Mail Accounts." Then select "Add Account." Select "Other." Then tap "Add CalDAV Account."

Now enter the following information:
 Server: dav.mail.uni-hohenheim.de
 Username: Your username
 Password: Your password
 Description: e.g., CalDAV
 Confirm your entry by clicking "Next."

Finally, you have the option to select which calendars you want to access on your mobile device.

All calendars you have access to will now be displayed in the Calendar app; you can use the checkbox next to each calendar to show or hide them.

You can synchronize your contacts in the same way. To do so, simply select "Add CalDAV Account" at the beginning.
