1. Semester	Inter- and Transcdisciplinary Approaches in Bioeconomics (4301-420)	Properties of Biobased Resources and Products (3701-470)	Agricultural Production of Biobased Resources (3403-430)	Fundamentals of Economics (1512-510)	Natural Science Concepts (1507-400)
	Inter- and transdisciplinary approaches in Bioeconomy, Lecture (4301-421)	Properties of Biobased Resources and Products, Lecture (3701-471)	Agricultural Production of Biobased Resources, Lecture (3403-431)	Fundamentals of Economics, Lecture and Exercise (1512-511)	Natural Science Concepts, Lecture (1507-401)
	Teamwork in interdisciplinary research groups, Seminar (4301-422)				
2. Semester	Sustainable Industrial Processes (1510-410)	Farm Economics and Value Chain Development (4101-460)	Economic Policy Analysis of the Bioeconomy (5213-510)	Financial Management (5101-590)	Projects in Bioeconomic Research - Group Project (1505-410)
	Biochemical Conversion of Renewable Resources, Lecture (1510-411)	Resource Use Optimisation for Permanent Crops and Forests, Lecture (4101-461)	Economic Aspects of the Bioeconomy, Lecture (5213-511)	Accounting and Managerial Accounting, Lecture (5101-591)	Projects in Bioeconomic Research, Group Project (1505-411)
	Thermochemical Conversion of Renewable Resources, Seminar (1510-412)	Value Chain Development and Risk Management in the Bioeconomy. Lecture (4101-462)	Model-based Analysis of Bioeconomy Policies, Exercise (5213-512)	Finance and Risk Management, Lecture (5101-592)	
3. Semester	Elective Modules (30 credits)				
4. Semester	Master's Thesis Bioeconomy (30 credits)
